

**MACP AGM 2022**

**14<sup>th</sup> November 2022, 7pm-8.30pm**

Report:	<b>Professional Development Report</b>
Committee Member:	<b>Komal Bhuchhada Msc MACP</b>
Date of report:	<b>30.09.22</b>

**Overview of Year**

This year the Professional Development Committee (PDC) launched the new hip imaging course in January 2022 which builds on our existing imaging portfolio. There has been a heavy virtual delivery this year with the advanced practice courses delivering well via this mode. MACP courses have been gaining interest internationally with participants from all over the world joining virtually. All courses have all been mapped to the FCP roadmap.

The PDC consists of Samantha Simmonds, Sinead Delaney, Tina Blewett, Feroz Mohamed, Basil Tyros, James Roberts, Ashish Sharma, Jenna Jagodzinska and Hazel Rudder.

The PDC has increased our promotional platform to Instagram using a themed promotion for courses. We promote via Instagram, twitter, frontline, icsp MSK journal and practice. The team consistently dedicate their time and effort to promote, meet tutors and virtually host our courses. This allows tutors to concentrate on the course itself rather than the technical aspects.

The PDC has moved promotion to Instagram this year and this platform is growing for promotion in addition to twitter.

**Progress against organisation's strategic aims and sub- specialist aims.**

All courses are delivered by expertise in their fields. Each course has been mapped to the FCP roadmap at a high standard to support MACP portfolio. 14fish allows courses to be linked and a redirection of booking will soon be on the website. The most popular courses requested and sold are the advancing roles courses.

## **Existing MACP Courses**

- Spinal Masqueraders
- Spinal Masqueraders Expanded
- Integrating Imaging into Musculoskeletal practice Lumbar Spine
- Integrating Imaging into Musculoskeletal practice Shoulder
- Integrating Imaging into Musculoskeletal practice Knee
- Integrating Imaging into Musculoskeletal practice Hip
